Sean Guillermo AIO Tools - SEO Checker v2.2

🎉 What's New in v2.2

All requested fixes and improvements have been implemented!

✅ Fixed Issues

1. Headings Order - Now Matches Page Order

Problem: Headings were displayed grouped by level (all H1s, then H2s, etc.) instead of page order.

Fixed:

- ✅ Headings now appear in **exact page order**
- ✅ If H2 comes before H1 on page, it shows first in the list
- ✅ Maintains the actual structure as it appears on the website
- ✅ Click any heading to jump to it on page
- ✅ Clicked heading **highlights with blue background** for 2 seconds
- ✅ Smooth scroll to center of viewport

How It Works:

- Extension now tracks `globalIndex` for each heading
- Preserves document order during analysis
- Popup displays headings using this preserved order
- Click-to-jump uses global index for accurate targeting

---

2. Warning Highlights - Prominent Visual Feedback

Problem: Warnings weren't visually prominent enough to catch user's attention.

Fixed:

- ✅ **Red pulsing border** around warning items (like your screenshot)
- ✅ Subtle red background tint
- ✅ Animated pulse effect draws attention

- ✅ Applied to Meta tab (title & description warnings)

Visual Design:

- 3px solid red border
- Subtle red background (5% opacity)
- Pulsing animation (2s cycle)
- Box shadow on pulse peak
- Matches the design in your screenshot

Where Applied:

- Meta Tab: Title length warnings (not 30-60 chars)
- Meta Tab: Description length warnings (not 120-160 chars)
- Easily expandable to other tabs

---

3. Nofollow Link Highlighting

Problem: No way to specifically highlight or filter nofollow links.

Fixed:

- ✅ New **"Nofollow" filter option** in Links tab
- ✅ Radio button to show only nofollow links
- ✅ Works with existing filter system

How to Use:

1. Open Links tab
2. Click "Filter" button
3. Select "Nofollow" radio button
4. List shows only nofollow links

Filter Options Now Include:

- All (default)
- Issues Only
- Internal
- External
- **Nofollow** (NEW!)

---

4. Robots.txt & llms.txt Links

Problem: No quick access to robots.txt and llms.txt files.

Fixed:

- ✅ **Clickable links** added next to INDEX/FOLLOW badges
- ✅ 📄 **robots.txt** link with file icon
- ✅ 🤖 **llms.txt** link with robot icon
- ✅ Opens in new tab when clicked
- ✅ Automatically constructs URLs from current domain

Visual Design:

- Clean button-style links
- Icons for visual identification
- Hover effect (turns purple)
- Opens in new tab
- Positioned in robots status section

How It Works:

- Extracts domain from current URL
- Constructs: `{domain}/robots.txt`
- Constructs: `{domain}/llms.txt`
- Links update automatically for each page

🎨 UI/UX Improvements

Warning Highlight System

CSS

```
.warning-highlight {
  border: 3px solid #ef4444;
  background: rgba(239, 68, 68, 0.05);
  animation: pulseWarning 2s infinite;
}
```

Robots File Links

- Inline with INDEX/FOLLOW badges
- Hover transforms and color change
- Smooth transitions
- Accessible and keyboard-friendly

📊 Technical Changes

Background.js

- Added `allHeadingsInOrder` array to preserve page order
- Tracks `globalIndex` for each heading
- Maintains backward compatibility with grouped headings

Content.js

- New `jumpToHeadingByGlobalIndex()` function
- Uses `querySelectorAll('h1, h2, h3, h4, h5, h6')` for accurate targeting
- Blue background highlight effect (2s duration)
- Smooth scroll with center alignment

Popup.js

- Updated `displayHeadings()` to use `allHeadingsInOrder`
- Added `jumpToHeadingByGlobalIndex()` function
- Updated `displayMetaInfo()` to set robots.txt/llms.txt URLs
- Added warning highlight classes to meta rows
- Added nofollow filter handling in `displayLinks()`

Popup.html

- Added robots.txt and llms.txt links to robots section
- Added nofollow radio option to links filter

Popup.css

- Added `.warning-highlight` class with pulse animation
- Added `.robots-file-link` styles

- Added `.robots-main` flex layout
- Improved hover states

🧪 Testing Checklist

Headings:

- [x] ~~Headings appear in page order~~
- [x] ~~Click heading scrolls to it~~
- [x] ~~Heading highlights with blue background~~
- [x] ~~Highlight fades after 2 seconds~~
- [x] ~~Works with all heading levels (H1-H6)~~

Warnings:

- [x] ~~Title warnings show red pulsing border~~
- [x] ~~Description warnings show red pulsing border~~
- [x] ~~Animation is smooth and noticeable~~
- [x] ~~Matches screenshot design~~

Links:

- [x] ~~Nofollow filter option appears~~
- [x] ~~Selecting nofollow shows only nofollow links~~
- [x] ~~Filter works with other options~~
- [x] ~~List updates correctly~~

Robots Files:

- [x] ~~robots.txt link appears~~
- [x] ~~llms.txt link appears~~
- [x] ~~Links open in new tab~~
- [x] ~~URLs are correct for current domain~~
- [x] ~~Hover effects work~~
- [x] ~~Icons display correctly~~

🚀 Installation

1. Extract `sean-seo-checker-v2.2.zip`
2. Go to `chrome://extensions/`
3. Enable Developer mode
4. Load unpacked → select `sean-seo-checker-v2.1` folder
5. Done!

📝 What Changed from v2.1

Feature	v2.1	v2.2
Headings in page order	❌	✅
Click-to-jump with highlight	⚠️ Basic	✅ Enhanced
Warning visual feedback	⚠️ Text only	✅ Pulsing border
Nofollow link filter	❌	✅
robots.txt link	❌	✅
llms.txt link	❌	✅

💡 Usage Tips

Jump to Headings:

1. Open Headings tab
2. Headings are in exact page order
3. Click any heading
4. Page scrolls and highlights it with blue background

Find Warnings:

1. Look for red pulsing borders
2. These indicate SEO issues that need attention
3. Fix the issue (e.g., adjust title length)

4. Reanalyze to see warning disappear

Filter Nofollow Links:

1. Open Links tab
2. Click "Filter" button
3. Select "Nofollow"
4. See only links with rel="nofollow"

Check Robots Files:

1. Open Meta tab
2. Click "robots.txt" or "llms.txt" link
3. Opens in new tab
4. Review file contents

🐛 Bug Fixes

- ✅ Fixed headings not matching page order
- ✅ Fixed click-to-jump targeting wrong heading
- ✅ Fixed warnings not visually prominent
- ✅ Fixed no way to filter nofollow links
- ✅ Fixed no access to robots.txt/llms.txt

Version: 2.2.0

Release Date: November 12, 2025
